

ZipZac® II Product Sheet

Features

- Same sleek design and functionality as the smaller ZipZac.
- The low level design of the ZipZac®II allows toddlers to move freely around on the floor to play and explore their world around them just like the smaller ZipZac®.
- Designed for toddlers as early as 2 years old and up to 5 years of age depending on their physical development. Fit to the chair is determined mostly by the width of the child's hips.
- Forward tip feature - The front casters are 0.75" above the floor so the tip feature only allows the chair to tip slightly forward enough so toddlers can pick up toys from the floor. The chair rights itself when the child leans back to normal position.
- Large 12" knobby latex-free wheels are placed forward where the child can easily reach the top of the wheels to push or pull on each wheel to propel the ZipZac®II forward or backward or turn in circles.
- The seat is polyurethane foam (no latex) providing comfort and durability, handling any toddler up to 10.5" inside width. An internal metal frame provides for secure mounting for the wheels, casters and soon to add accessories (i.e. IV poles, foot extension, and push handle)
- Patented design – US & International, & Utility patent pending
- Convenient handle for carrying the chair.

Specifications

- Dimensions assembled – 23.5" x 19" x 14.5"ht (current ZipZac II)
- Chair unassembled – 23.5"x12.5"x 12"ht
- Inside seat – 10.5"W x 9.5"L x 9"D
- Weight 17.5 lbs. (7.94 kg)
- MSRP \$2,200 USD, check our website for pricing.
- www.zipzac.com
- Covered by Patents No. 8,496,261 D550,971 and D553,865
