

ZipZac[®] Product Sheet

Features

- The low level design of the ZipZac[®] allows toddlers to move freely around on the floor to play and explore their world around them.
- Designed for toddlers as early as 9 months of age up to 3 years of age. Fit to the chair is determined mostly by width of hips
- Forward tip feature - The front casters are 1" above the floor so the tip feature only allows the chair to tip slightly forward enough so toddlers can pick up toys from the floor. The chair rights itself when the child leans back to normal position.
- Large 12" knobby latex-free wheels are placed forward where the child can easily reach the top of the wheels to push or pull on each wheel to propel the ZipZac[®] forward or backward or turn in circles.
- The seat is polyurethane foam (no latex) providing comfort and durability, handling most toddlers. An internal metal frame provides for secure mounting for the wheels, casters and soon to add accessories (i.e. IV poles, foot extensions, and push handles)
- Convenient handle for carrying the chair.
- Patented design – US & International, & Utility patent pending
- For larger toddlers, check out the ZipZac[®] II for children 2 years to 5 years of age.

Specifications

- Dimensions assembled - 19" x 17" x 12"ht
- Chair unassembled – 19"x 12"x 9.5"ht
- Inside seat – 8.5"W x 8"L x 5.25"D
- Weight 12 lbs. (5.44 kg)
- MSRP \$2,000 USD, check with local distributor or our website for pricing.
- www.zipzac.com
- Covered by Patents No. 8,496,261
D550,971 and D553,865
